

Dear Parents and Caregivers

Term 4 has arrived and promises to be a busy and short one. Welcome to our new children and families in Team 3.

Unit Studies

We have a Language focus to start the term off, with each teacher choosing their own theme.

To end the year we have the Life Education caravan coming to school. Team Three's topic is Happy and Healthy. This looks at feelings and how we deal with them and also what it means to be friendly to others.

Maths

Algebra and Geometry will be our strand focus this term. In Algebra the children will be using the mathematical symbols =, <, > for the relationships "is equal to", "is less than", "is greater than". In Geometry the children will make, name and describe, using their own language and the language of geometry, everyday shapes and objects.

In Number the children will still continue with all 4 number operations. (Addition, subtraction, multiplication and division) and fractions. With fractions the children will be writing and solving story problems which involve halves, quarters, thirds and fifths.

Art

We are concentrating on fabric and fibre using different materials. We would really appreciate any donations of wool and/ or large sized knitting needles.

Music

Mrs Kus continues to teach music to the children in our team. Some children are also involved in the junior choirs and / or orchestra.

Health and Physical Education

With the weather improving we will be getting out on the field on Tuesday afternoons and participating in Athletics. We have also planned our Education Outside the Classroom activity.

Summer uniform and sun hats

All children should be in summer uniform. This means no track pants and everyone should be wearing a navy blue sunhat when they are outside. Please check that all items of clothing are named.

We are looking forward to a great term. Any queries please ask your class teacher or come and see me.

Thanking you for your continued support

Jillian Mitchell
Deputy Principal
